

## WHEELED VACUUMS

An ECHO Bear Cat Wheeled Vacuum is a great way for homeowners, commercial crews, or municipalities to quickly and efficiently pick up leaves, grass, or other light debris. With a variety of engines available and either push or 3-speed, self-propelled drive options, there's a Wheeled Vacuum that will fit your job.

Standard features for each model include five different height settings for easy pick-up on any type of terrain, a six-bushel capacity quick dump bag, adjustable handle bars with cushion grip, a five-blade radial fan that delivers more CFM than any other competitor vacuum, and easy-to-manuever 12"x2.5" rubber tires with ball bearing hubs.

A variety of options are available for each model including extra bags, a hose kit for hard-to-reach areas, pivoting casters for easy maneuvering on hard surfaces, and a nozzle wear plate.

An optional 4' hose kit gets into hard-to-reach areas

Model No.	Engine	Intake Width (in)	Drive Type	Starter Type	Weight (lbs)	Tires
WV160	160cc Honda	27	Push	Recoil	108	12"x2.5"
